User ID & Password provided

Modules accessing and viewing

Demo on software like Gas Station Online are available

We give Smart Solutions to your software requirement.

The following projects is ready for customization

- Vehicle Tracking and Management

In the Vehicle Tracking, you are independent working on your own server/PC having your own Static IP/Global IP. Here you have full security as you are not dependent on other web services. You have flexibility of operation and no rentals.

Gas Station Management System (GSMS)

Outlet setup

This covers the adding a new Gas Station to the system. Outlet names, Address, Phone number, Postcode, Fax, Email address are captured as a part of this. A maximum of 10 outlets are supported with the server software. Additional clients can be purchased in the batches of 5 each.

User setup

This module provides the maintenance of users (add, delete, update) in the system. The user first name, last name, address, phone number, mobile number, Email address and Photo are captured as a part of this. User Login ID and Password are provided for each user. User can be assigned to a particular role (in or across gas stations).

Fuel Type setup

This module allows adding various types of fuels. This information is used in Payin's, Payout's , reports.

Payment mode setup

This module allows adding various mode of payments (like cash, credit card, check, transfer). This information is used in Payin's, Payout's , reports.

Shift Time setup

For each gas station we can define the time in which the outlet operates. We can define the number of shifts in which the outlet operates and the duration of each shift. We can also define the start time and end time of each shift.

Role setup

This module provides the various roles the system supports. Basically there will be 4 roles available in the system.

Daily Transaction setup

This module allows (add, update, delete) various daily transactions. This includes payouts, payins. This also includes the fuel and merchandise. This is also captures the mode of payment. This information is used in

Reports setup

This module allows view/generate various reports. Get the details.

Bank Account setup

This module allows setup the bank account details. This covers the bank name, bank address, postal code, account number, account name, account address, zip code.

Tax Set up

This module covers taxes on various types of fuel and commodities.

Convenient Store Setup

This module covers inventory, sales, etc.

Other modules are not listed here. Gas Station Chain having more than one outlet will have more modules and can be inter-linked.

Requirement may vary from place to place and type of Gas Station with or without convenient store. It is custom solution.

Gas Station Online – Software

Petrol Station - Gas Station - Petrol Pump Management Software Online Solution is customized and user-friendly software.

Chain of Gas Stations

A more efficient way to manage and monitor the daily books of gas stations with or without convenience stores is Gas Station Online Software to maintain and manage daily transactions online.

Currently multi-sheet excel spreadsheet is used in each Gas Station. Traveling to each Station or store everyday to check books is becoming difficult and time consuming.

The software is ideally suited to convert current excel spreadsheet into a multi-station, multi-user portal where clerks, managers or owners, can login to complete the daily/end-of-day the data entry.

User management

Administrator will be able assign different roles for different stations. Managers can manage multiple stations. Manager will be able to view the current and previous week entries. Owners can have full access of all records.

Flexibility

The administrator or the owner or the manager can assign duties or manage store or group of stores or all chain stores. He can assign group, add group, change group with color options for each group.

Description

Daily, Monthly, and Annual tracking of Sales, Returns, Purchases, Credits, Refunds, Gift Certificates, Lottery tickets, and others are included..

Complete Employee, Customer, Vendor Management. * Inventory Tracking by department, item, and category.

Flexible taxing system: Rate of Tax for different items is taken care. Updating taxes is also available.

Create user roles, and easily associate permissions with each role.

Users are allowed to access program areas.

Other features include

1. Multiple Bank Account Management utility
2. Payroll Tax Estimation Calculator
3. Tracking of employee work schedule(s)
